3D Systems Brings New 3D Printers To Japan

- Explore Latest Printers, Capabilities and Materials
- Print More Faster in High Definition and Full Color

ROCK HILL, South Carolina –June 19, 2012 – [3D Systems Corporation](#)

(NYSE:DDD) announced today that the company will showcase its latest 3D content-to-print products and services at the Design Engineering & Manufacturing Solutions Expo, DMS, 2012, held June 20– 22, in the Tokyo International Exhibition Center, booth 21-34, Tokyo, Japan.

[3D Systems](#) will demonstrate its unmatched portfolio of 3D printers, including its eight new [ProJet™ 3500](#) printers that offer ultra-high definition and precision wax printability. Productivity and performance will be highlighted through its [ProJet™ 6000](#) that combines push button simplicity with real [SLA®](#) part performance and its just announced, full color [ZPrinter® 850](#), boasting the largest print area in its class.

3D Systems will also display its latest [SLA®](#) production system, the iPro 8000, its [on demand parts services](#) and its personal color printers [3DTouch™](#) and [ProJet™ 1500](#), bringing together complete ideation-to-production capabilities for professionals and consumers.

“We are ecstatic to share our unparalleled portfolio of products and services with DMS attendees,” said Cathy Lewis, Vice President, Global Marketing for 3D Systems. “From the highest definition to speed, from full color to unrivaled part performance, we are democratizing creativity through access to affordable [3D printers](#), compelling [3D content](#) and [on demand parts](#) services for the benefit of our growing, global customer base.”

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides creative content development, design productivity tools and curation services and downloads. Its expertly integrated solutions replace, displace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, communicate, prototype and produce functional parts, empowering its customers to create with confidence.

About DMS 2012

Design Engineering & Manufacturing Solutions Expo (DMS) is Japan's largest exhibition, gathering all kinds of IT solutions such as CAD, CAE, ERP and production systems. DMS attracts a significant number of professionals from design, development, production engineering and information systems departments, who are looking to buy solutions for their businesses.
