3D Systems Brings Next Generation 3D Printer to Japan

- The Only 3D Printer to Deliver Professional Grade SLA[®] Parts Fast -

ROCK HILL, South Carolina, June 28, 2011 – 3D Systems (NYSE:DDD) announced the introduction of faster, professional grade 3D Printers, the ProJet™ 6000 series. The ProJet™ 6000 was the star of the Design Engineering & Manufacturing Solutions Expo, DMS 2011 held June 22–24th, in the Tokyo International Exhibition Center, Tokyo, Japan.

The [ProJet™ 6000](#) is the only 3D printer to deliver the precision and performance quality of professional grade [SLA[®] parts](#) faster than any other printer on the market today. The ProJet™ 6000 comes in three high-definition print configurations with a wide range of new [VisiJet[®]](#) print materials including tough, flexible, clear, dental and high temperature. The ProJet™ 6000 is designed to deliver the highest part quality for the toughest production applications with the ease of use and affordability of our professional 3D printers.

“We are excited to bring a new, breakthrough 3D Printer to Japan where quality, productivity and compactness are critical,” said Buddy Byrum, Senior Director, 3D Printing for 3D Systems. “Our Japanese customers depend on us for the latest in professional grade SLA[®] part quality and performance with user friendly printer utility and speed, and the [ProJet™ 6000](#) delivers.”

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials, creative printable content development, curation and downloads and on-demand custom parts services for professionals and consumers alike. Its expertly integrated rapid prototyping and manufacturing solutions reduce the time and cost of designing new products and printing real parts directly from digital input. These solutions are used to design, communicate, prototype and produce functional end-use parts empowering our customers to create with confidence.
