3D Systems Presents Its Breadth Of Aerospace Manufacturing Capabilities

- Latest Aerospace and Defense Solutions On Display At AUVSI 2010 -

ROCK HILL, South Carolina – August 23, 2010 - 3D Systems (NASDAQ: TDSC) announced today that it plans to exhibit the benefits of its growing Aerospace Manufacturing capabilities at the Association for Unmanned Vehicle Systems International, [AUVSI 2010 Conference and Exposition](#). The company's suite of design-to-manufacturing solutions and services will be on display at the Colorado Convention Center in Denver, CO, August 24 – 27th, booth 2728.

For over a decade, [3D Systems](#) has been leading the adoption of large scale custom manufacturing solutions for aerospace, defense and transportation applications. Along with the company's [3D Manufacturing Centers](#) and [3D Printers](#), customers can source their entire unmanned vehicle system's components and other non-structural parts through 3D Systems' premier, certified parts service [3Dproparts™](#).

"Our growing suite of manufacturing solutions and services come with the assurance of consistent quality, reduced costs, improved time to market and lower part weight and count, all critical to the success of unmanned vehicles and other transportation systems," said Cathy Lewis, 3D Systems vice president of global marketing. "We are committed to completely transforming Manufacturers' workflow, costs and lead-times away from labor intensive traditional methods and into the digital age."

Forward-Looking Statements

Certain statements made in this release that are not statements of historical or current facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements may involve known and unknown risks, uncertainties and other factors that may cause the actual results, performance or achievements of the company to be materially different from historical results or from any future results expressed or implied by such forward-looking statements. In addition to statements that explicitly describe such risks and uncertainties, readers are urged to consider statements in the conditional or future tenses or that include terms such as “believes,” “belief,” “expects,” “estimates,” “intends,” “anticipates” or “plans” to be uncertain and forward-looking. Forward-looking statements may include comments as to the company’s beliefs and expectations as to future events and trends affecting its business and are necessarily subject to uncertainties, many of which are outside the control of the company. The factors described under the headings “Forward-Looking Statements,” “Cautionary Statements and Risk Factors,” and “Risk Factors” in the company’s periodic filings with the Securities and Exchange Commission, as well as other factors, could cause actual results to differ materially from those reflected or predicted in forward-looking statements.

About 3D Systems Corporation

3D Systems is a leading provider of 3D Printers, 3D Manufacturing Centers and 3Dproparts™ solutions. Its expertly integrated solutions reduce the time and cost of designing products and facilitate direct and indirect manufacturing by creating actual parts directly from digital input. These solutions are used for design communication and prototyping as well as for production of functional end-use parts: our customers Create With Confidence.
