3D Systems Releases Accura[®] Sapphire

- New Jewelry Print Material A Real Gem -

ROCK HILL, South Carolina, November 22, 2011 – [3D Systems](#) Corporation (NYSE:DDD) announced today the immediate availability of [Accura[®] Sapphire](#), a new print material for jewelry design and high-volume production. High-precision, detailed Accura[®] Sapphire patterns and parts will be on display at EuroMold November 29th – December 2nd, 2011 in Hall 11, Booth F110.

“We are pleased to add Accura[®] Sapphire to our growing portfolio of [SLA[®] print materials](#),” said Steve Hanna, Director Global Sales and Marketing Materials, 3D Systems. “Accura[®] Sapphire delivers increased jeweler productivity through faster build speed and cleaner pattern burnout during casting. This material is extremely durable, allowing jewelers to set stones prior to casting, saving time and money.”

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides creative content development, design productivity tools and curation services and downloads. Its expertly integrated solutions replace, displace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, communicate, prototype and produce functional parts, empowering its customers to create with confidence.
