

Enabling an End-to-End Workflow through Medical Device Design and Manufacturing Services

3D Systems helps medical device companies increase and accelerate innovation to deliver the highest quality products and improve the standard of care.

DESIGN

Create complex features such as lattice structures for improved implant performance.

MANUFACTURE

Best-in-class printers and software support for high-quality manufacturing of medical devices.

INSPECT

Experienced quality and regulatory teams ensure highest quality devices.

MANAGE

Access sourcing flexibility by printing with 3D Systems, in-house manufacturing or through 3D Systems' certified partner network.

25+ YEARS

Industry experience

CERTIFIED FACILITIES

FDA Registered and ISO 13485 certified

600,000+

Medical devices manufactured

BENEFITS FOR MEDICAL DEVICE COMPANIES:

- ✓ Expertise in design for additive manufacturing
- ✓ OEMs can introduce products to market faster
- ✓ Enables flexibility of supply chain through multiple sourcing options
